Insulated Server MMS & CMS Server Update

PRODUCT UPDATE BULLETIN

EFFECTIVE | AUGUST 2023

- Improved design and manufacturing process for the 94000 Cream Server (CSM) and 94070 Condiment Server (MMS)
- No price change - Same capacity - Same functionality - Same insulation performance
- Pumps 94010 and 94080 are discontinued - would need to order a new CSM or MMS

DETAILS

In an effort to control costs, the 94000 Cream Server (CSM) and 94070 Condiment Server (MMS) has been redesigned. Although the food-holding capacity does not change, the shroud height decreases from 8" to 6 7/8".

Thorough testing was done to insure the insulation performance remains the same as the original design.

Pumps 94010 and 94080 are discontinued. If these would need replacement, customers would need to order a new CSM or MMS.

MODELS AFFECTED

94000 CSM Cream Server

94070 MMS Condiment Server

ORIGINAL DESIGN

NEW DESIGN

IMPROVED DESIGN. COSTS CONTROLLED.
